D. D. MANN TELLS THE YEAR'S PLANS

C.N.R. Expects to Build to Landing and Wolf Creek This Year. But Will Not Reach Beauseau

"We expect to build six hundred miles of railway this summer in the three Prairie Provinces. We already have two hundred miles built. Our engineers tell us that we can get enough men to help us. We will have to wait until next year to reach Landing and to Wolf Creek this summer. We will also make a start towards the Peace River country, but we will not reach the Brazeau [sic] this year.

In these words did D. D. Mann, vice-president of the Canadian Northern Railway, tell the Bulletin the plan of his company's extension this summer, west and south of Edmonton. Mr. Mann arrived from Vancouver last night and goes east to Winnipeg this evening. He has been at the coast investigating for the commissioners the western end of the line from Victoria to Edmonton, the part of which is in British Columbia, and the part which the McBride government construction will be started at once at Victoria.

Commissioner Bouillon and the City Commissioner Who Failed to Inspect a Day Before Submits a Report — If Further Neglected Soon Unde-Use.

The First street hoist has many defects and is not receiving proper care, is the substance of the report to the commissioners by Commissioner Bouillon and City Engineer Lattornell, who made an inspection a few days ago of this convenience.

The inspection was made last Saturday when the hoist was in operation and on Sunday morning when it was not. The commissioners found that the hoist is not receiving the care and attention that should be commanded by its use to move heavy public service and if longer neglected will soon cease to be useful for public use.

Memorandum of Defects. The committee made a memorandum of defects that they deemed important. These were:

1. The hoist is not held firmly in the floor with the walls and floors of the engine room and machinery spaces. The hoist is liable to become extremely hazardous as a fire risk, liable to ignition by spontaneous combustion or from other causes.

2. Mr. Mann was asked as to whether his company had any interest in the building of the Alberta and Great Waterways railway, the reply was that they had no interest, nor had he discussed.

Visited City Office. Mr. Mann had some negotiations with reference to a union station in Edmonton.

"There is no need of a union station yet," replied Mr. Mann. "The present C. N. R. station is large enough to handle all traffic, and T. P. business for some time to come."

Mr. Mann was asked as to whether his company had any interest in the building of the Alberta and Great Waterways railway, the reply was that they had no interest, nor had he discussed.

Holding Hope Cheaper. The holding hope rope is neither spliced nor connected to the cable in either a workmanlike or safe manner and this rope is allowed to run on the ground on one of the inclines and also on the head of a metal bolt which holds the cable in place. It is an ill-tempered, and further the drum on the south incline should have more weight than the one on the north.

4.—The car structures themselves have damaged parts and are not repaired.

5.—In the engine room the second intermediate gear-shaft appears to be badly bent and a bearing and its foundation at one end of the first intermediate gear-shaft are broken.

6.—The government established a new coal mine in Jasper Park on the 1st of April, 1909, and Mr. H. C. subsequently disposed of a part of his interest in the property to a group of Chinese and Indian men.

The Edmonton men who have a third interest in the company which Mr. H. C. has disposed of to Frank B. Smith, and J. L. Cole, M.P.

The others are James Robertson, A. G. Greenhill, W. E. Nobles, J. Pyke, James A. Brook, and Milton L. Jersey, of Montreal; D. C. Cameron, A. G. Greenhill, and R. P. McLeish, of Vancouver.

The company has a branch in the Jasper Park Collieries. Two five mines have been at work on the property for two months and there are not now many men left on the property, the face of which has been uncovered.

The coal has been shipped to the foot of the line of the G.T.R. The transhipment point of the C.N.R. runs through Jasper Park and the south end of the G.T.R. to the south. Extensive development work is to be carried on this summer and it is expected that it will be in active operation next year.

AGREEMENT REACHED. Presidents Get New Schedule of Rates From C.P.R. Co.

Ottawa, June 10.—After a prolonged conference, representatives of the Western Canadian Press and the C.P.R. Telegraph Company today succeeded in reaching a satisfactory basis of rates for the services to be provided to be charged by the company. The agreement covers both rates west of Winnipeg and between the two cities and Winnipeg. The company has agreed to file with the Railway Board as soon as possible the proposed individual and the societies.

The rates must be filed in time for the rates to take effect not later than August 1st.

Church Union Resolution. Belleville, Ont., June 10.—At the Congregational Union meeting the following resolution was adopted:

This Union considers the action it has taken sufficient for the present and will now wait until other negotiations have been completed before taking any further steps.

Mr. Tate proposes that the government should undertake to loan money to help hardy out of the administrative stages of the movement, and that the government should make available to the people of the most serious items found in the condition of the retaining walls on each side of incline.

These walls have been damaged so far as to do away with the necessity of having the grain cleaned.

4.—That this plan be put into force for about two years, and then the government should take over the management of the project.

Besides the foregoing arrangement Mr. Tate proposes that the government should undertake to loan money to help hardy out of the administrative stages of the movement, and that the government should make available to the people of the most serious items found in the condition of the retaining walls on each side of incline.

5.—That this plan be put into force for about two years, and then the government should take over the management of the project.

Besides the foregoing arrangement Mr. Tate proposes that the government should undertake to loan money to help hardy out of the administrative stages of the movement, and that the government should make available to the people of the most serious items found in the condition of the retaining walls on each side of incline.

Without committing himself or the commission to an acceptance of his plan, Prof. Magill said that he would be willing to go to the investors to help him to bring his suggested com-

promise to a successful conclusion.

With regard to the proposed arrangement Mr. Tate stated that his suggestion appealed to a very great diversity of opinion prevalent and he believed the same had gone through the minds of all the parties involved.

The only solution which would be generally acceptable would be the general

agreement arrived at today.

The rates must be filed in time for the rates to take effect not later than August 1st.

Farmer Killed in Well.

Lethbridge, June 10.—Joseph Tucker, a farmer, twenty miles south of here, was killed in a well on his farm. He fell down from the bottom of an eight foot well. The knot used to hold him tight fell. He was killed instantly.

REDUCED DUTY ON RAW MATERIALS

Order in Council Adds Several Classes to Free List and Reduces Duty on Many More

Ottawa, June 10.—An order in council promulgated today places on the free list a number of raw materials, while on others the duty is slightly reduced. The following articles are included:

1.—Five heads of metal and carbide.

2.—Insulating thread for use in making incandescent gas meters.

3.—Crude glycerine for refining.

4.—Cattle feed, and manure to be used as cattle food and fertilizer.

5.—Iron tubing brass covered, for use in making tanks and bath-tubs.

6.—Ground coke for electrical purposes.

7.—Following articles used in manufacture are to be subject to reduced duty:

8.—Separations from propylene and wood naphtha, preferential 6 per cent, and ad valorem intermediate 7 per cent.

9.—Sulphuric acid, imported for making rubber, preferential rate 5 per cent, and ad valorem intermediate 7 per cent.

10.—Wood handles, to be made of D-shaped shanks, preferential 6 per cent, and ad valorem intermediate 7 per cent.

11.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

12.—General preference 5 per cent.

13.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

14.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

15.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

16.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

17.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

18.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

19.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

20.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

21.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

22.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

23.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

24.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

25.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

26.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

27.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

28.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

29.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

30.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

31.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

32.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

33.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

34.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

35.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

36.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

37.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

38.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

39.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

40.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

41.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

42.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

43.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

44.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

45.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

46.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

47.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

48.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

49.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

50.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

51.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

52.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

53.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

54.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

55.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

56.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

57.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

58.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

59.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

60.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

61.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

62.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

63.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

64.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

65.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

66.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

67.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

68.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

69.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

70.—Tin cans, imported for use in the manufacture of preserves and pickles, preferential 5 per cent, ad valorem intermediate 7 per cent.

NEW CANADIAN TRADE TREATIES

Tariff Agreements Negotiated With Belgium, Holland and Italy
By Canada

Ottawa, June 10.—On the eve of his departure for Europe the Hon. W. S. Fielding, in reply to a question as to the tariff negotiations with the United States, stated that no immediate results were only postponed for a short time, owing to the engagements of Canadian ministers in the United States. He had not failed to observe, he said, that there was a considerable number of Canadian manufacturers desirous of reciprocity with the United States. Some of this was natural and innocent, but there were others who, he thought, due to a misunderstanding of the situation, and was at least premature.

MONT BRENCH BOTH PAINED.

Opponents of reciprocity appeared to assume that no satisfactory tariff concessions would be made by the United States, and that the past experience of Canada in her negotiations with the States deserved credit. But there was no need for anxiety,

to worry along these lines. The Sir John Thompson cabinet, so willing to make a Canadian entry into the benefits of Canada. A treaty to be worth having would be advantageous to all, and the recent negotiations of the Canadian opponents of reciprocity proved correct if the American government, in its present arrangement, them, of course, would be "so bad." But it would be quite right to the States to assume that the attitude of former years was to be continued.

President Taft and the Senate have given most cordial assurances of the desire of the United States government to enter into reciprocity relations between the two countries.

WILL PROMOTE FRIENDLY RELATIONS.

The友好的關係 of the Canadian government, Mr. Fielding said, were bound to receive the assurances of the American government in the good spirit in which they had been given, and to hope for a satisfactory arrangement. It was certain that the Canadian government would be advanced to the point where the negotiations of the Canadian opponents of reciprocity proved correct if the American government, in its present arrangement, them, of course, would be "so bad." But it would be quite right to the States to assume that the attitude of former years was to be continued.

UNITED STATES RETALIATES

IMPOSE COUNTERVAILING DUTY ON WOOD

Washington, D. C., June 9.—Pulp,

printing, paper, manufactured

from wood cut on the crown lands in

Quebec, will be imposed by May 1,

1910, to the countermeasures of

the United States to the amount of

25 cents a cord or its equivalent

in value, to be imposed on the manufac-

tured state of Quebec, and will be im-

posed by the new tariff law, according

to the terms of the trade agreement.

The tariff law mandates that

wood cut on the crown lands in

Quebec, will be imposed by May 1, 1910, to the countermeasures of

the United States to the amount of

25 cents a cord or wood cut on

crown lands before May 1. For this

reason, the Canadian government has

decided to impose a countermea-

sure on the products of Quebec.

The tariff law provides that if any

country imposes an export duty on

wood pulp, this export duty shall be added

by the United States on imports.

Wood pulp, which is a Canadian

product, will be subject to a

countermeasures of 25 cents a cord or

its equivalent in value.

The tariff law provides that if any

country imposes an export duty on

wood pulp, this export duty shall be added

by the United States on imports.

Wood pulp, which is a Canadian

product, will be subject to a

countermeasures of 25 cents a cord or

its equivalent in value.

The tariff law provides that if any

country imposes an export duty on

wood pulp, this export duty shall be added

by the United States on imports.

Wood pulp, which is a Canadian

product, will be subject to a

countermeasures of 25 cents a cord or

its equivalent in value.

The tariff law provides that if any

country imposes an export duty on

wood pulp, this export duty shall be added

by the United States on imports.

Wood pulp, which is a Canadian

product, will be subject to a

countermeasures of 25 cents a cord or

its equivalent in value.

The tariff law provides that if any

country imposes an export duty on

wood pulp, this export duty shall be added

by the United States on imports.

Wood pulp, which is a Canadian

product, will be subject to a

countermeasures of 25 cents a cord or

its equivalent in value.

The tariff law provides that if any

country imposes an export duty on

wood pulp, this export duty shall be added

by the United States on imports.

Wood pulp, which is a Canadian

product, will be subject to a

countermeasures of 25 cents a cord or

its equivalent in value.

TWENTY-FOUR YEARS AGO

Taken from the files of the Edmonton Bulletin for Saturday, June 12th, 1886.)

Snow fell in Vermont on May 26th. Costs are expected for \$1.25 a bushel.

Eggs, 2c a dozen; butter, 8c a pound.

Spindly rain on Friday; did a world of damage.

The mining snow started up the river on Monday.

The Northwest is expected about the 25th to have Grand Rapids.

L. Kelly is erecting a frame stable on his lot on Main street, 18x18. W. 1910.

A bill to incorporate the Kootenay and Athabasca Railway company has been introduced.

Jas. Price has sold 11,000 cabbage, cauliflower and brussels sprouts this spring and has planted 4,000 more.

A culvert is being put in a small gully on Main street at the head of the hill in the Edmonton government account book.

Seeding was finished this year earlier than three years past. It was over last week instead of May 20th, when wheat had failed to connect.

Chief Salmon, of Bowden, brought in his traps and set his traps for the police this week.

The commissioners bought them when on his way south.

The river is now high enough for navigation since the 4th of May.

The delay in steamboating has been due to the late opening of Whitemud.

The forest fire at the Edmonton hotel has been getting away lately,

endangering the building. A gang of men have been at work this week setting back the flames.

A boat returned from a visit to Scotland on Tuesday of last week.

There is no sign of oil in the country.

Spring seeding commenced about the 1st of April.

A party of men started this week to improve the road on the west side of the Black Mud creek above the bridge, on an appropriation of \$250 from the North-West government.

W. A. Oliver has erected a bridge on Elkkinie's creek, south side of Fort Bowden, and has shoveled out the bridge, which shortens the trail considerably, doing away with the "necessity" of portaging.

On Tuesday last the H. B. Co. paid their school taxes amounting to \$266. About \$100 of this was from the city.

A number of non-residents have paid up like little men. Three hundred dollars were paid up by the residents on the district up to November 1st.

On Sunday last Rev. Mr. George's house at Bowden was severely damaged by a smudge which had been left in it for the benefit of mosquitoes, while the people were at church.

On the same day a building in the same settlement was burned down, having caught fire from a candle.

H. C. Hendon and his men were suc-

cessful in smelting the rock from their mine this week, and will give it to the city free of charge at present.

They reduced the rock in the cupola to a soft mass, but could not get it to run.

The men are still at work, and the ap-

pearance of the partly melted rock and

are sending specimens for ex-

amination.

PREPARED TO DIVIDE FIELD.

Toronto Electric Light Company Makes

Proposition to City.

Toronto, June 10.—Sir Henry Pellatt, president of the Canadian Pacific Railway, has addressed a letter to the mayor and board of control proposing arrangements for the sale of the power plant at Toronto for light and power purposes. The terms suggested are that the city shall restrict its system to the area within the city limits, street lighting and power and light required for municipal buildings and light required for private dwellings. The city and hydro-electric power companies may agree to make regarding the joint use of the companies' poles and conductors.

Rates for private consumers are to be fixed charges of 10 per cent. on the value of the plant, plus allowances for depreciation and other necessary reserve funds. Any surplus of profits to be applied to the payment of rates. It is understood that a statement is made that the rates will not be found greater than those charged by the city's electrical department.

The mayor is to be an executive member of the committee to manage the hydro-electric light company and all disputes are to be settled by arbitration. The gradual transfer of the power plant to the city in the business sections is promised. The Hydro-Electric Power commission will start delivering power to Toronto in six weeks.

RAIN IS NOT NEEDED.

Nothing In Any Way Approaching

Drought in The South.

Calgary, June 10.—There is very little rain for people to get alarmed in regard to lack of moisture for the growing crops, said Mr. McMillan, manager of the Bank of Montreal, yesterday. Mr. McMillan had just returned from a ten days' trip through Alberta and Saskatchewan as far east as Regina.

"Of course," he said, "in some parts the conditions for crops are not growing as rapidly as they would if there were more rain, but the general moisture of soil is good, and there was an excess of good all over the country, and since then there have been lots of rains here in the last few days."

Mr. McMillan took an automobile

trip from Medicine Hat to Regina

and back, across the boundary and

reports having seen fields of splendid

fall wheat and other grain.

From Medicine Hat to Regina

the crops are looking well, and up over

the C. P. R. to Edmonton there has been plenty of rain.

Between Calgary and Edmonton the whole

country is looking very well.

The hills between Calgary and Lethbridge appeared to be the driest

parts of the country. A good soaking

rain is needed, and it would con-

ceivably bring about a wonderful change.

"Crops are looking well, and there

is abundance of feed in these parts."

Buy Whilst Buying's Good

There are very few opportunities like this of investing either \$50 or any multiple of \$50 in such an undertaking as

WESTERN CLAYS Limited

The preference shares are entitled to a dividend of 10 per cent. before any other distribution of profits. They rank before the common stock as regards the assets of the company. They participate equally in all dividends after both Preference and Common shareholders have been paid 10 per cent. The par value of preference shares now offered is altogether only \$50,000 and the estimated value of the land acquired is \$1,000,000. This value is on the raw clay suitable for making vitrified sewer pipes.

A First Class Plant is to be Installed IMMEDIATELY So That Work

may be commenced before winter sets in. This plant is the most modern and most efficient that English manufacturers can produce. It is designed to operate winter and summer

Invest in This and be Part Owner of one of the Great Monopolies of the West

There are only five similar deposits known and operated on the whole American Continent. None of these are in Western Canada. This gives the company the enormous advantage over competitors of long haul and 33 per cent. duty, and the Western demand for vitrified Sewer Pipe is ample for the needs of this Company "and then some."

LOCALS.

A meeting of the council of Local Improvement District 27-8-4 will be held on Saturday, June 13, at 8 a.m. at the home of Mr. W. C. Johnson, 196 8th St.

Mr. Alexander Marshall, evangelist of Scotland, will preach in the Glenmore Tabernacle on Sunday evening, June 13, at 7 p.m., also Monday, June 14, at 7 p.m.

At Emmanuel Presbyterian Church tomorrow the pastor will preach morning and evening. Evening subject: "Actions Under God's Approval."

BANKEERS COMPANY PROPOSED

A meeting of the directors of a bank company in connection with the 1910 regiment, and in connection with the proposed new regimental hall, is to be held at the Traders bank on Monday evening, June 13th, at 8 p.m. Some 150 men from the regiment, in several of the eastern districts, and it is to be hoped that the no difficulties will be experienced in forming such a company here. The training is a splendid one, and specially beneficial to those whose time coincides with their service. It is expected that the Edmonton bank men will all help to make the proposed company a success.

ST. MICHAEL BAPTIST CHURCH

A good time is promised all who attend the anniversary services at the above church tomorrow and Monday, June 13-14. The services will be at 10 a.m. and 7 p.m. The organist will be Mr. W. H. Williams, and the choir. Services Preaching at 11 in the morning; an open Sunday school, followed by a service for young and young, and preaching service again at seven o'clock in the evening. The services will be in the musical character throughout the day.

A church social will be held at eight o'clock in the evening.

Friends and friends will give short addresses, which will be interspersed with singing, quartettes, singing and refreshments.

A thanksgiving collection will be taken up during the services for the purpose of redecorating and painting the church inside and out.

SPORTING NEWS

THE RING.

LITTLE TAKES ACTION.

San Francisco, June 10.—There were two big battles in the ring yesterday. The first was the sparing of Johnson and the proprietors of the Seal Club, and the second was the fight of Attorney Acton, representing Johnson's dispossessed manager, Geo. Little. The big fight, which was also agreed upon by Attorney Acton. They were directed not to fight, but Little had received his share of Johnson's earnings in accordance with the agreement, calling for the payment to Little as manager, of 25 per cent of all revenue from theatricals, boxing contests in which Johnson may figure. Johnson did not object to be斗ed by "Papa" Acton.

To show how little I think of this fight, I am ready to fight you, said Johnson. Jim Jeffries' answer to all inquiries.

—Corbett, pleaded a visitor, whose time was limited, can we see him?

"Make him live, put him on the glove," said Corbett. "I'd like to tell what he makes Johnson do any thing. He does exactly as he pleases. If he says we have to box, if he says fish and game, we'll do it."

The first boxing bout with Jim Corbett drew a large crowd. It had often been expected little from himself beyond a draw, but he has given the public a thrill.

"I'm going to shoot a few right upsets at you," said Corbett. Corbett's choice of Jeffries was a happy one.

Jeff for three rounds and when Farmer Barre called time at the end of the third round, Jeffries was still in the ring.
